Pre questionnaire:
- Have your previous experiences with predictive text in messaging or email applications been positive, negative, or neutral?
  - Neutral
  - Do you use the single-word predictive text? If so, is your experience generally positive, negative, or neutral?
  - Sometimes, it can help for longer words but especially when you get a newer phone before it adjusts the predictions to your texting habits it's not very good.
- On a scale of 1 to 5, 1 being not helpful at all and 5 being extremely helpful, how useful do you think single-word suggested text is?
  - 3.
  - What about multi-word suggested phrases?
    - 4, I use Gmails new feature predicted phrase more frequently especially at work with clients or coworkers. Sometimes the suggested phrase is close to what I want but not exactly, so in those cases I might select the response anyway and just replace the ending.
- On a scale of 1 to 5, without using the system, how would you rate the visual appeal of the interface?
  - 4
  - On a scale of 1 to 5, how easy do you think the system will be to use?
    - 4

Post task questionnaire for food service conversation without suggested responses:
1. Was it easy to type the responses?
   a. Yes
   b. Feedback from participant during task: "This would be helpful if those are the condiments I like on my burger, but since in a real-life situation I'm a lot more particular so I'd have to type them out. In situations where you want the most common thing like ketchup it would be helpful."
2. Do you think this interaction would have been shorter if you could select suggested responses?
   a. Yes

Post task questionnaire for food service conversation with suggested responses:
1. Was it easy to select the suggested responses?
   a. Yes, if there was an easy way to select with keyboard it would have been even easier
2. Do you think this interaction would have taken longer if you had to type out your responses?
   a. Yes

Post task questionnaire for movie service conversation without suggested responses:
1. Was it easy to type the responses?

       a. Yes, it was hard to know if my responses would be similar to the ones suggested to the system though

2. Do you think this interaction would have been shorter if you could select suggested responses?
       a. Maybe, it depends on the responses offered

Post task questionnaire for movie service conversation with suggested responses:
1. Was it easy to select the suggested response?
       a. Yes
2. Do you think this interaction would have taken longer if you had to type out your responses?
       a. Yes

Post questionnaire:
- Would you like to see any additional features that are not currently implemented?
  - Ability to see and select answers without using the mouse would be good to continue typing on the keyboard if needed.

  - Which of these is the most important to you?
- Was it easy to figure out how to use the system from the user interface?
  - Yes
  - If yes, what elements in the interface helped?
  - Consistent UI, worked as expected
  - If no, what do you think could be added or changed?
- On a scale of 1 to 5 (1 being unsatisfied and 5 being extremely satisfied) what is your level of satisfaction with our system's current functionality?
  - 4
- On a scale of 1 to 5 (1 being very difficult and 5 being very easy) how easy was it to use the application?
  - 4
